Session 10

JDBC Demo

<u>Steps to follow:</u>

1. Consider pds_demo domain for this project application.
2. Complete **Project_Report.pdf** Document.
3. Create database using OR mapping .
Database must include minimum three tables and Foreign key constraints.
4. Build Project Application using JDBC.
Application must have user driven programming with ATLEAST following functionality:
   - **Database Connection**
   - **Select operation (Should accept values from console)**
   - **Update a record. (Should accept values from console)**
   - **Inset a new record. (Should accept values from console)**
   - **Delete a record. (Should accept values from console)**
   - **Exit**

Upload rollno_Project_Report.pdf file to LMS.
